910CL Optical Fiber Cleaver

Ideal for both indoor and
outdoor splicing applications

Cleave fiber consistently and accurately.

The Greenlee Communications 910CL is a precision optical fiber cleaver that quickly helps cable technicians prepare single and multi mode fiber cable for splicing.

Best used when paired with the Greenlee 910FS Optical Fusion Splicer, the 910CL cleaves fiber consistently and accurately. The cleaved fiber remains in the adapter and the entire unit can be inserted into the 910FS, saving time, reducing damage to the fiber, and giving you faster, more accurate results every time.

The Greenlee Communications 910CL Optical Fiber Cleaver—cleave fiber faster, simpler, and easier.

Features

The 910CL Fiber Cleaver consistently cleaves flat; a key requirement for good splices. The interlocking mechanism also prevents cleaving until proper tensioning is complete. Easy to clean and adjust, the rugged construction makes the 910CL best suited for field use.
