

NEBO REDLINE BIG DADDY is a waterproof (IPX7) 4x zoom 2000 lumen flashlight, featuring OC™ optics housed in an all aircraft-grade aluminum body, with 5 lighting modes.

FEATURES

• 4X ADJUSTABLE BEAM

Turn the head clockwise for flood light, perfect for illuminating everything within a 20 yard distance. Turn the head counter-clockwise for spot-light to focus light up to 346 meters.

• WATERPROOF (IPX7)

Under the IPX7 designation, this REDLINE is able to withstand immersion in water up to 1 meter for up to 30 minutes. This means that getting caught in the rain, or dropping it in a puddle of water is nothing to worry about, but prolonged exposure such as using it as a diving light would be harmful.

• ANODIZED AIRCRAFT-GRADE ALUMINUM COMPACT BODY DESIGN

Designed to fit almost anywhere, the body is virtually Indestructible to ensure reliability.

• REAR GLOW-IN-THE-DARK BUTTON

This button allows you to easily switch settings* while maintaining constant control of the flashlight. The button also glows in the dark so that you can easily find this flashlight. (*Button uses hard/soft touch technology allowing settings to be changed in two different ways.)

Hard touch: Simply click through the functions (light will turn off in between settings.) NOTE: Light will reset to first setting (100% ON) after being off for 8 seconds.

Soft touch: Press button halfway with no click. This allows the user to cycle through the settings quickly without the light turning off between settings.

5 LIGHTING MODES

• MODE 1 - 100% POWER (2000 LUMEN)

Click the Rear Button 1 time for 2000 Lumen of white light. (3 hour run time / Viewing distance 346 meters) (LED Bulb 110,000-plus hour life)

• MODE 2 - 40% POWER (800 LUMEN)

From the previous mode, click (2x) or soft touch (1x) the Rear Button for 800 Lumen of white light. (6 hour run time / Viewing distance 219 meters)

• MODE 3 - 10% POWER (500 LUMEN)

From the previous mode, click (2x) or soft touch (1x) the Rear Button for 500 Lumen of white light. (15 hour run time / Viewing distance 173 meters)

• MODE 4 - STROBE (2000 LUMEN)

From the previous mode, click (2x) or soft touch (1x) the Rear Button to activate the Defensive Strobe Mode. (6 hour run time)

• MODE 5 - BEACON MODE (2000 LUMEN)

From the previous mode, click (2x) or soft touch (1x) the Rear Button to activate the Beacon Sequence. (8 hour run time)

Floodlight with OC™

(simulation of light beam size below is based on a surface 2 meters away)

The OC™ (Optimized Clarity) Technology creates a perfectly dispersed beam of pristine light when used in flood mode.

Spotlight Beam

346 meter beam distance in High Mode
(1,135 feet = more than 3 football fields)
